

A (nearly) unmodified Python socket program.
Instead of “import socket”, “import
switchyard.lib.socket.socketemu”

Switchyard socket emulation layer

Switchyard protocol stack
Call `send_packet()` and `recv_packet()` for sending/receiving on
the underlying hardware. Use `ApplicationLayer.send_to_app()`
or `ApplicationLayer.recv_from_app()` for delivering/receiving
messages to/from an application.

Underlying hardware (real, or simulated for tests)
